

Civil Engineering Words Scrambled Letters

CAN YOU HELP ENGINEER ELLIE UNSCRAMBLE THESE LETTERS TO MAKE WORDS?

(Hint: the words appear in bold text at the bottom of this page)

TUSERCURTS _____

MTHA _____

NEECICS _____

SENHIGL _____

MOUPTSCRE _____

WSEFYARE _____

SEYAFT _____

SUNETNL _____

DESRGIB _____

NOTROSITNCCU _____

What are Civil Engineers?

Civil engineers design **structures** using knowledge that kids learn in school subjects like **math**, **science**, **English** (when they write reports) and **computers** to help them do their work. At the Arizona Department of Transportation, civil engineers help cars and other vehicles get from place to place. They design **freeways** so that traffic jams can be avoided, keeping in mind **safety** and efficiency. What if a train track,

mountain or a canyon is where the road needs to go? Civil engineers can solve this by designing **tunnels** or **bridges** to go through, over or even under these obstacles. They also can supervise the **construction** and maintenance of their designs to make sure everything is going according to plan and the roads are in good condition.
