

# SR 195; I-8 TO US 95

## Engineering and Environmental Study

### Public Information Meeting

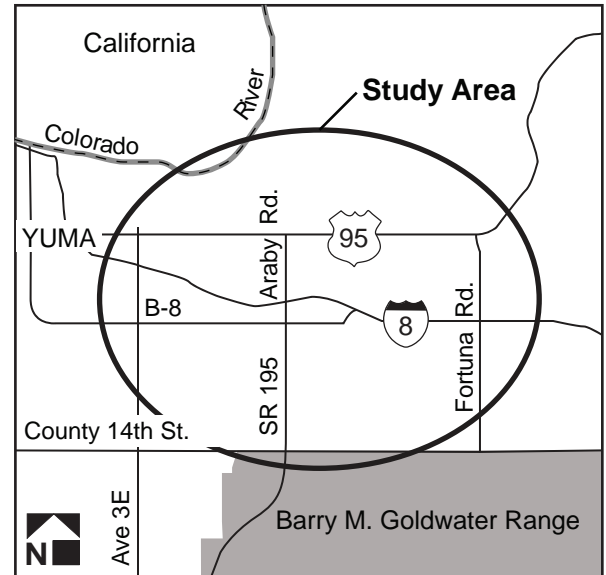

September 17, 2009

#### Purpose of Meeting

The Arizona Department of Transportation (ADOT) and the Federal Highway Administration (FHWA) are presenting recommendations from the May 2009 Alternative Selection Report and Environmental Overview for the proposed extension of State Route 195 (SR 195) between Interstate 8 (I-8) and US 95 in Yuma. The Alternative Selection Report documents the screening process used to narrow the original eight feasible corridor alternatives to four corridor alternatives (in addition to a no build alternative) which will be carried forward for further study.

#### Study Purpose and Need

The purpose and need for this study is to extend SR 195 north of I-8 to connect to US 95 and complement the local and regional road network. Extending SR 195 north of I-8 to US 95 would provide a connection for the movement of goods north and south between the United States and Mexico.

#### Corridor Alignment Alternatives

Maps with potential alternatives are provided on the back of this page. These corridor alternatives, as well as a no build alternative, have been selected to be carried forward for further study as part of the ongoing engineering study.

#### Study Schedule and Process

- Fall 2007: Obtain agency and public input on the planned study, identify potential alternatives, prepare environmental overview
- Fall 2009: Present corridor alternatives for further study at a public information meeting
- Winter 2009: Prepare engineering and environmental studies
- Spring 2010: Present preferred alternative at a public hearing
- Winter 2010: Finalize study and environmental documents

#### Your Input

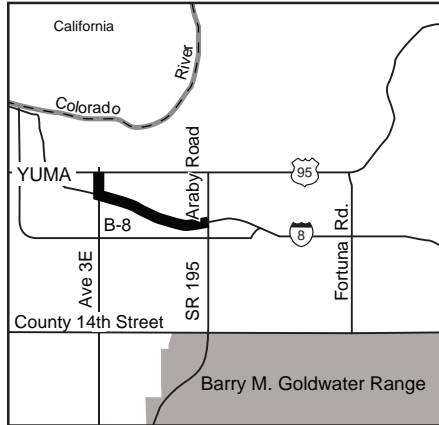

The primary objectives of public scoping are to learn about issues and concerns that you feel should be addressed in this study, to obtain your input on the preliminary corridor alternatives, and to listen to your suggestions. The information received will be used in the potential development of SR 195. Please provide your comments by October 2, 2009, to:
