

160 REVISIONS

The Arizona Department of Transportation's Traffic Engineering Group maintains two distribution lists:

1. All Holders of the MUTCD
2. All Holders of the ADOT Traffic Engineering PGPs

160.1 ALL HOLDERS OF THE MUTCD

Revisions to the MUTCD are developed by the FHWA through the Federal Register process. FHWA documents become effective when ADOT receives notification of the approved changes from the FHWA.

The Traffic Engineering Group will notify everyone on the distribution list for "All Holders of the MUTCD" of subsequent revisions to the MUTCD. The notice will either contain the revisions or provide instructions on obtaining the revisions from Engineering Records or elsewhere.

When it is desired to distribute MUTCD revisions via Engineering Records, it is the Traffic Engineering Group's responsibility to coordinate with Engineering Records on the reproduction or purchase of the documents.

160.2 ALL HOLDERS OF THE ADOT TRAFFIC ENGINEERING PGPs

The ADOT Traffic Engineering PGPs will be updated and revised as needed. Additional sections may be forthcoming as well.

The Traffic Engineering Group will distribute additions and revisions to the PGPs to everyone on the distribution list for "All Holders of the ADOT Traffic Engineering PGPs".
