### COMMENTS AND QUESTIONS:

ADOT is committed to providing construction information to stakeholders and welcomes your comments and feedback. For further information and to request weekly project updates, call the 24-hour project hotline at 602.787.3927 or email ADOT@hdrinc.com.

## PROJECT SUMMARY

The Arizona Department of Transportation (ADOT) is improving the pavement on State Route 87 (Arizona Avenue) from Baseline Road to south of Guadalupe Road at the Western Canal. Approximately 1.5 miles of existing pavement will be removed and replaced with rubberized asphalt pavement.

Replacing the pavement on Arizona Avenue will require lane closures and a reduction of the speed limit. Access to businesses will be maintained, however some access may be restricted for short periods during paving operations.

## PROJECT SCHEDULE:

Construction will begin in late March and will continue through May. Construction activities will take place during both daytime and nighttime hours.

As with any complex construction project, there is a possibility that the schedule could be impacted by weather or other unforeseen circumstances.

## PROJECT BENEFITS

Rubberized asphalt, or "quiet pavement," is composed of regular asphalt paving mixed with used, ground tires. Rubberized asphalt is environmentally friendly; resurfacing projects such as this recycle thousands of used tires. ADOT has successfully engineered the use of more than 10 million waste tires into over 2,500 miles of state highways. Quiet pavement is smoother and quieter than conventional asphalt paving. Quiet pavement reduces tire noise by an average of four decibels.
