OPTIONAL QUESTIONS:

How many years of Partnering experience do you have? Over 16 years

PARTNERING CONSULTANT PROFILE

OTHER SKILLS:

Renee is a Certified Value Specialist and leads formal value engineering teams during design. She has also been providing Scoping/Partnering services for the beginning of a CM at Risk project to get the groups together at the beginning of the project and determine very critical aspects of a CM at Risk contract. She has been successful working with Sundt and ADOT on the Loop 303 project in this regards. The agenda is very different from a traditional Partnering workshop. This agenda or a similar agenda is good to use during the design portion of a Design/Build project as well. She just led a UDOT and Kiewit team through their very first program for a \$114M Design/Build Project for the I-15.

Additionally, Renee has developed a formal Risk Analysis program approach to begin working with the Alternative Delivery Teams to start identifying and assessing risks associated with a project. This will help to open up lines of communication as well as avoid costly project costs during the construction of a project. This can be used with both CM at Risk and Design/Build projects.

Renee has the ability to lead Facilitated Issue Resolution workshops. When project teams have difficulty in resolving issues but they want help in getting them to stay focused on the issue and coming to an agreement on the next steps, Renee works together with these teams.

Renee has over 22 years of experience in the design and construction industry. It is very easy for her to adapt to any type of project and any challenge that may occur on a project or during a workshop. She has the ability to help teams see the big picture and focus on getting project issues resolved in a timely manner.
