

I-10 (Val Vista to Earley) Widening Project

February 2012

Project overview

Construction of the I-10 (Val Vista to Earley) Widening Project began in late January 2011. This project is part of ADOT's vision to increase capacity along this heavily-traveled corridor on I-10 between Tucson and Phoenix. The residents of Casa Grande and I-10 motorists will be able to enjoy a new and improved segment of interstate highway that will better serve the area. This \$31 million, 10-mile project is scheduled to be completed by the end of 2012.

Project features

- This segment of I-10 will be widened from two to three lanes in each direction.
- Road improvements will be made at McCartney Rd. and Florence Blvd. traffic interchanges, as well as repaving Val Vista Rd., Cottonwood Ln., and Earley Rd. overpasses.
- Over a mile of sound walls will be built south of Florence Blvd. along the Mission Royal Community.
- Thanks to funding from the Surface Transportation Enhancement Fund, new landscaping will help drivers enjoy their drive along the corridor through the City of Casa Grande area.

Slow down in the work zone

As always, drivers are reminded to proceed through the work zone with caution, slow down, and be alert for construction equipment and personnel.

For more information

ADOT strives to inform the public about planned roadway restrictions. Please visit azdot.gov to sign up for traffic alerts or you may also call Tony Staffaroni, Senior Community Relations Officer, 602.245.4051, astaffaroni@azdot.gov, to learn more about this project. For the latest highway conditions around the state, visit the ADOT Traveler Information site at www.az511.gov or call 511.
