Subject: Barrier Summary Sheets- Revised Summary Sheets and As-Building

The Barrier Summary Sheets available on the Roadway website have been revised to include an as-builtting note for identifying the guardrail end treatment that is installed by the contractor by circling the option chosen. This will provide as-built information on the system installed. Design personnel should start using the new summary sheets as soon as practical. This process improvement is not important enough to delay a project or cause any significant rework. Be sure to implement on new projects. It is also requested that field personnel redline the barrier summary sheets for as-builtting by circling the end treatment option installed by the contractor.

Please forward this e-mail to all your design personnel, consultants, and field personnel. Thank you.

The revised summary sheets can be viewed and printed at:

http://www.azdot.gov/Highways/Roadway_Engineering/Roadway_Design/Summary/index.asp

and can be downloaded at:

http://www.azdot.gov/Highways/Roadway_Engineering/Roadway_Design/CADD/Resources/Index_v8.asp
