## **320      WARNING SIGNS**

---

Warning signs are used to guide and warn traffic of conditions on or adjacent to a highway or street which would not be reasonably apparent to, and would not have been anticipated by, a vehicle operator exercising due care.

Warning signs alert vehicle operators to use caution, reduce speed, or make a maneuver in the interest of the operator's safety and/or that of other vehicle operators and pedestrians.

Warning signs may be supplemented with a yellow flashing beacon.

Warning signs shall be reflectorized or illuminated to show the same shape and color both by day and by night.

Sign sizes and legends for various type facilities are found in the Manual of Approved Signs.
