Notes:

- (1) Travel figures prior to 1993 are based on gasoline and use year fuel sales by county, then adjusted by all available traffic count data. After 1993, travel estimates are based on traffic counts, adjusted by changes in county fuel consumption and population changes.
- (2) These figures are primarily derived from factored traffic counts on State System Highways.
- (3) These figures are *best estimates of actual vehicle travel* – judicious use is suggested.
- (4) Figures prior to 2003 exclude estimated travel on freeway interchange crossovers.
