NOTES:
1. See specifications for materials and construction.
2. Match drill holes in angle frame with holes in cover plate.
3. Secure a 1/8" x 2" neoprene or similar suitable synthetic rubber gasket onto angle frame before drilling.
4. All steel surfaces shall be galvanized after fabrication per applicable requirements of ASTM A325.
5. See plans for number and size of conduit cutouts required and location of applications.
6. The steel box shell and steel lid shall be bonded in an approved manner.
7. Conduit connector to the junction box shall be with threaded connectors and locknuts, the interface between the conduit and the box shall be sealed before the concrete pour.
