DETAIL 1 NOTES:
1. Light-duty pull boxes shall not be used in areas where they will be driven over.
2. Pull boxes in sidewalks shall be placed so there is positive drainage away from the box lid.
3. Placing pull box in sidewalks shall be avoided if possible.

PULL BOX INSTALLATION IN SIDEWALK - DETAIL 1
(With Curb and Gutter or Just Curb)

Conduit for Vehicle Detection Lead-in, See T.S. 6 or 7 Series, if applicable.

DETAIL 2 NOTES:
1. Pull boxes shall not be placed in drainage ditches or retention basins. Light-duty pull boxes may be used if offsets from traveled way are over 20' and the boxes are not in areas where they will be driven over.
2. In snow removal areas, boxes shall be installed directly behind the pole unless specified otherwise by the engineer.

PULL BOX INSTALLATION IN SIDEWALK - DETAIL 2
(Without Curb and Gutter)

GENERAL NOTE:
1. See plan for actual pull boxes, locations, conduit routing, and sizes.
2. Depth of pavement & subgrade varies.

NOT TO SCALE
