BOX ON BARRIER FACE DETAIL

ELEVATION B-B

SPECIAL NOTE:
1. These junction boxes should only be used if there is no other reasonable alternative to provide access to conduits. The box shall only be applied to concrete barrier shape that is compatible.

2. Interface between angle and concrete shall be sealed with a 25-year silicone caulk.

3. See sheet 2 of 2 for other requirements.

4. The steel box shell and the steel lid shall be bonded in an approved fashion.
