

I-15, Virgin River Bridge No. 6

Environmental Awareness Training

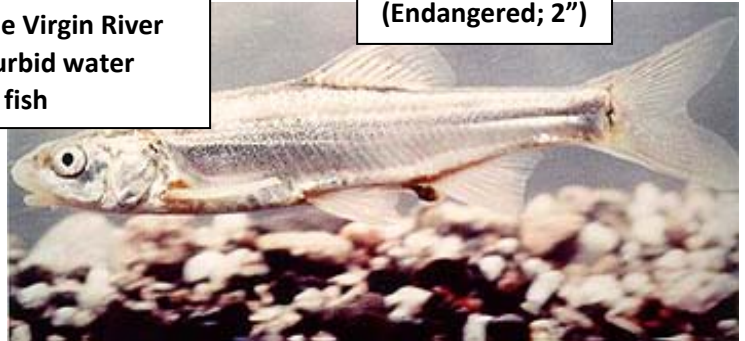

Geotechnical Investigation

Salisbury and Associates, Inc.

Virgin River chub
(Endangered; 18")

- Chub is found only in the Virgin River
- Woundfin adapted to turbid water
- Critical habitat for both fish

Woundfin
(Endangered; 2")

Mojave Desert tortoise
(Threatened; 9-15")

- Herbivores
- High mortality
- Report sightings; do not touch

Southwestern willow flycatcher
(Endangered; 4-5")

- Thrive near water
- Adapted to saltcedar
- Critical habitat

MINIMIZE DISTURBANCE TO HABITAT AND SPECIES

- Pick up all trash – good housekeeping
- Report any condors or tortoises immediately to supervisor and Resident Engineer (928.774.1799)
- Follow the Spill Prevention Plan
- No work in the river or use of Virgin River water
- No drilling next to Pier 2 except from gravel bar (stay on the gravel bar and out of the water)
- No direct access to or storage in the floodplain
- No storage or nighttime use of staging areas
- No vegetation removal outside of flagged limits
- Minimize dust, erosion, sedimentation
- Wash all equipment before entering the construction site

California condor
(Endangered; 9-10')

- Almost extinct
- Attracted to trash
- Report sightings
